

The Yearbook of World Electronics Data series presents market and production statistics for the **GLOBAL** electronics industry. Available in three published volumes covering 53 countries and 13 major product groups, the yearbook is used in the formulation of business and market planning, in tracking trends based on a clear understanding on how the industry has developed historically and to provide a basis for medium and long-term forecasting.

Publication Data: October 2026

"The Yearbook of World Electronics Data - enabling you to put your business into a regional and global context"

The Yearbook of World Electronics Data

For each country production and market data is supplied for the following product groups:

Computers
Consumer – Video; Audio; Personal
Control & Instrumentation
Medical
Industrial
Office Equipment
Radio Communications
Telecommunications
Components – Passive Components; Semiconductor
Other Components

Methodology

The Yearbooks highlight market trends and opportunities and offer corroborative evidence for individual research. Each new edition is fully revised and updated. Trade statistics are analyzed in detail, with over 500 separate categories being employed. Production statistics are collected from Government and Manufacturer's Association sources where these are available. Extensive use is also made of research reports, company reports, news items and work by other consultants to supplement and cross check the official and semi-official sources.

Markets are forecast in real terms for the next five years, with production forecast for the next two years, using constant exchange rates and excluding inflation. These are based on our extensive knowledge of the historical performance of each product, the general economic outlook and the major growth influencing factors.

Electronic Delivery

The **Yearbook of World Electronics Data** is available electronically through a combination of Word and Excel spreadsheet formats allowing you to customise and manipulate the data quickly and easily.

- Produce your own subsets or summaries of the data by product or geographical region/territories of your own choice
- Build your own assumptions and calculations into the forecasts
- Copy and paste into your own reports, presentations and other documents.

For larger organisations/companies the Yearbook Corporate Licence allows global distribution throughout your organisation.

Related Products & Services

European Electronics Production 2000-2029

As part of its program of research covering developments in the European electronics industry RER has released a statistical database providing a medium term outlook for electronics production in Europe. Covering the period 2000-2027 the research allows you to track developments both geographically and by major product group.

The database is provided as an Excel spreadsheet providing production data for 13 product groups and 29 countries split by Western Europe and Central and Eastern Europe. The 2024 update is published in November with subscribers ordering prior to publication receiving the current database free of charge.

Global Electronics Production & Markets

Launched in 2012, Global Electronics Production & Markets provides top line analysis on the global electronics industry for the period 1995 - 2029 for markets and 1995- 2026 for production. Through two Excel databases you can quickly analyze the structure of the global industry and how it has changed both geographically, through RER's unique coverage of 53 countries, and by thirteen major product groups. The database will be fully updated in November 2024

Country Reports

Drawing on data from its core statistical database RER provides a quick, reliable and cost-effective assessment of the electronics industry for an individual country. For a full listing please visit www.rer.co.uk

Custom Research

Building on the flexibility of the two databases and the Yearbook series we can quickly search data by product or country/region to provide solutions tailored to your specific needs or budgets. Ideal for input into internal presentations/ documents the data is supplied via email.
